Complete the answers to the questions below to complete your project report. Create a PDF of the completed document and submit the PDF with your project.

Question	Your answer:
Step 2: Domain Choice What domain did you choose to fine-tune the Meta Llama 2 7B model on? Choices: 1. Financial 2. Healthcare 3. IT	Financial
Step 3: Model Evaluation Section What was the response of the model to your domain-specific input in the **model_evaluation.ipynb file**?	Genomic characterization is essential for > the establishment of a reference genome that can be used for comparative genomic analyses. We sequenced the genomes of 1055 individuals from 111 populations of the world (Fig. 1, Table 1). The 111 populations were chosen to represent all =================================== ==
Step 4: Fine-Tuning Section After fine-tuning the model, what was the response of the model to your domain-specific input in the **model_finetuning.ipynb file**?	The investment tests performed indicate 'generation'
